

Know Your Zone: Schreiner's Iris Gardens Last Date to Order Iris for 2013

Iris must be planted at least six weeks before the first frost in order to ensure good growth the following spring. Therefore, when temperatures begin to drop around the continental US, we slow down shipping. Below is the schedule for the last date to place your order for 2013.

* Schreiner's Iris Gardens' guarantee applies to plants that have been properly planted before the first frost. Orders placed after the above cut-off dates will forfeit our quality guarantee.
